

2016 USA Shooting Winter Airgun
Match Director's Bulletin #1
28 November 2016

RE: Rules to be enforced.

ISSF Rule Update Notes:

- 1) USAS is still evaluating the impact of the new ISSF 140mm restriction on the buttstock of air rifles. This rule will be exempted from enforcement in the USAS Rulebook until further notice.
- 2) ISSF 10m Rifle "Weights" Update: USAS will follow the requirement for the weights to be within the fundamental shape of the stock, but will exempt "Tape cannot be used to attach weights" as there are still interpretations being discussed online.
- 3) All other ISSF Rule updates, including the new allowances on buttplate and forend depth, will be in effect for the 2016 Winter Airgun Championships.
- 4) Blinders – Rifle and pistol athletes can use one front blinder (30 mm maximum width) but may no longer wear side blinders.
- 5) Corrective Optics - Rifle athletes will be allowed to place a single corrective lens in or on their rear sights.
