

## USA Shooting NATIONAL RECORDS

*As of January 2019*

USA Shooting recognizes national records for each ISSF, special event, and developmental events recognized by USA Shooting. For the junior category, records will be recognized for Junior (open), J2, and J3. Senior, Intermediate Senior, and Veteran Senior category records will also be recognized.

To be recognized as a national record, the score must be fired in a USA Shooting recognized special or developmental event or an ISSF event in a USA Shooting sanctioned competition. The competition must have been conducted on facilities that meet all technical requirements for distances, timing, etc. The competitor who fired the record score must be a current USA Shooting member and have used only equipment that completely fulfills all requirements for that event as per the General Technical Rules. If equipment control was not conducted at the beginning of the competition, the competition director may conduct a special equipment control to certify that the competitor's equipment fulfilled these conditions. National records may not be set in leagues or postal competitions.

Individual records may be set in those events that contain a minimum of 5 competitors for any event. Any event fired at a reduced distance with reduced distance targets, must follow all requirements of the official event. (i.e. 50-meter events reduced to 50-feet must follow requirements for the 50-meter event.) Team records have been retired.

National records will be recognized if the score is fired in an international competition supervised by the ISSF. The competitor must have been a member of the USA Shooting sponsored team for that activity.
